賽事期間	2026-12-02T00:00:00+02:00 至 2026-12-09T23:59:00+02:00

官方資訊摘要

【Official Description】
IJSO is an annual individual and team competition in the natural sciences for students under sixteen. It integrates physics, chemistry and biology rather than treating them as separate single-subject Olympiads.

【Competition Structure】
The IJSO syllabus and statutes provide for multiple-choice, theoretical and experimental components, with practical work completed in teams. English is the working language for the International Board and team leaders, while delegations may prepare translations.

【2026 International Event】
The 23rd IJSO is scheduled for December 2–9, 2026 in Sofia, Bulgaria. This date is also listed by official national selection organisers.

【How to Enter】
Students must qualify through the official selection system of a participating country or region. The international website does not provide a direct individual application or a unified Macau deadline.

參賽資格

Students must be under 16 years old on December 31 of the competition year and selected as an official national or regional representative. Local selection rules and eligibility may be stricter.

獎項 / 結果

International medals are awarded from the combined individual competition results under IJSO regulations; the experimental examination also assesses team scientific work.
