官方資訊摘要

【2026 Contest】
PhysicsBowl is an international high-school physics competition administered under school supervision. The examination contains 40 multiple-choice questions and lasts 45 minutes. Questions cover a typical high-school physics curriculum.

【Divisions】
Division I is intended for first-year physics students and Division II for second-year physics students. A school team score is the sum of its top five student scores; individual students may also sit the examination.

【Administration】
The 2026 examination was available online or as a printable PDF and could be administered on any day from March 18 to April 3. The extended registration deadline was February 25 at 23:59 EST. A qualified independent proctor is required; parents, relatives and close friends are not acceptable proctors.

【Rules】
No penalty is applied for wrong answers. Non-programmable calculators may be used, and an equation sheet and constants are provided.

參賽資格

High-school students taking the examination through a registered school or approved proctor. Five students are required for the school team competition, but individual participation is permitted.

獎項 / 結果

AAPT recognises student and school performance by division and region and issues participation certificates. The official 2026 exam, solutions and results are now published for practice and verification.
